SUSTAINABILITY ALTERNATIVE PROPOSAL

Submitted by: Promach Pte. Ltd.

Promach Pte. Ltd. supports Singtel's sustainability objectives by adopting practical, efficient, and environmentally responsible approaches in our project execution, while ensuring full compliance with project specifications, regulatory requirements, and operational feasibility.

The following sustainable alternatives can be considered, subject to Client approval, site conditions, and technical suitability:

1. Energy Efficiency Enhancement
Adoption of energy-efficient equipment and systems where applicable, with optimization of installation and commissioning practices to ensure efficient operation, reduced energy consumption, and improved system performance.

2. Environmentally Responsible Refrigerants
Preference for systems utilizing low Global Warming Potential (GWP) refrigerants, where compliant with NEA regulations and aligned with project specifications.

3. Material Optimization and Reuse
Reuse of existing serviceable materials such as supports, containment, and piping routes where feasible, to minimize material wastage and reduce environmental impact.

4. Waste Management and Recycling
Proper segregation, recycling, and disposal of replaced materials through licensed waste contractors, in accordance with environmental regulations and best practices.

TM© [2020] Promach Pte. Ltd. All Rights Reserved.

5. Durable Material Selection
Use of corrosion-resistant and durable materials to extend equipment lifespan, thereby reducing replacement frequency and long-term environmental impact.

6. Resource and Logistics Efficiency
Careful planning of materials and work sequences to minimize over-ordering, abortive works, and unnecessary transportation, contributing to reduced carbon footprint.

7. Digital Documentation
Adoption of digital submissions, reports, and documentation where possible to reduce paper consumption and improve efficiency.

8. Preventive Maintenance Approach
Implementation of effective maintenance strategies to enhance system efficiency, reduce operational losses, and prolong asset life.

Promach Pte. Ltd. operates under certified management systems including **ISO 14001 (Environmental Management System), ISO 9001 (Quality Management System), ISO 45001 (Occupational Health & Safety Management System), and BizSAFE STAR**, ensuring a structured and compliant approach towards sustainability and continuous improvement.

All proposed alternatives are indicative and shall be subject to Client approval, consultant requirements, and project specifications. Promach shall not be held liable for any design changes, performance variations, or cost implications arising from the adoption of these alternatives.

A detailed Sustainability Alternative Proposal is submitted as a separate attachment for further reference.

5. Conclusion

Promach Pte. Ltd. remains committed to delivering the project responsibly while supporting sustainability objectives in a practical, compliant, and cost-effective manner.
